## **Cluster Analysis Using Sas Enterprise**

Cluster analysis is often referred to as supervised classification because it attempts to predict group or class membership for a specific categorical response variable. Clustering, on the

# Access PDF Cluster Analysis Using Sas Enterprise Guide

other hand, is referred to as unsupervised classification because it identifies groups or classes within the data based on all the input variables.

In segmentation, the aim is simply to partition the data in a way that is

# Access PDF Cluster Analysis Using Sas Enterprise Guide

convenient. Convenient may refer to something that is useful, as in marketing, for example. In clustering, the objective is to see if a sample of data is composed of natural subclasses or groups. This may be the objective in customer profiling.
