SlideShare supports documents and PDF files, and all these are available for free download (after free registration).

### Critical Heuristics Of Social Planning

Critical Heuristics of Social Planning has been recognised as the seminal work on critical systems thinking. Ulrich offers a new approach both to practical philosophy (which has until now remained rather unpractical) and to systems thinking (which has reduced the systems idea to a tool of merely instrumental, rather than practical, reason).

Critical Heuristics (or by its full name: Critical Heuristics of Social Systems Design) is a new approach to both systems thinking and practical philosophy, an approach that aims to help the applied scientist in respect to this task.

### Critical heuristics of social systems design - ScienceDirect

Critical System Heuristics (CSH) provides a framework of questions about a program including what is (and what ought to be) its purpose and its source of legitimacy and who are (and who ought to be) its intended beneficiaries. CSH, as developed by Werner Ulrich and later elaborated upon in collaboration with Martin...

### Critical System Heuristics | Better Evaluation

A heuristic is a mental shortcut that allows people to solve problems and make judgments quickly and efficiently. These rule-of-thumb strategies shorten decision-making time and allow people to function without constantly stopping to think about their next course of action. Heuristics are helpful in many situations,...

### Centre for Systems Studies, University of Hull

Critical systems heuristics (CSH) is a framework for reflective professional practice organised around the central tool of boundary critique. This paper, written jointly by the original developer, Werner Ulrich, and Martin Reynolds, an experienced practitioner of CSH, offers a systematic introduction to the idea and use of boundary critique.

### Critical Systems Heuristics | SpringerLink

Werner Ulrich (born 1948, Berne, Switzerland) is a Swiss social scientist and practical philosopher, and a former professor of the theory and practice of social planning at the University of Fribourg. He is known as one of the originators of critical systems thinking (CST).

### Werner Ulrich - Wikipedia

Established by Ulrich (1983), critical systems heuristics (CSH) is one of the most widely discussed methodologies in the field of CST. CSH is a tool that aims to systematically expose the assumptions of decision makers and planners in order to reveal whose interests are being served.
