Harte Research Institute for Gulf of Mexico Studies Series ...

A seashell or sea shell, also known simply as a shell, is a hard, protective outer layer created by an animal that lives in the sea. The shell is part of the body of the animal. Empty seashells are often found washed up on beaches by beachcombers.

Seashell - Wikipedia

Bivalves include oysters, scallops and clams. More than 100,000 and maybe as many as 200,000 molluscan species inhabit the world, with 2,455 or so found in the Gulf of Mexico and probably more than 1,000 within Texas, according to the Encyclopedia of Texas Seashells (Texas A&M University Press, 2010).
