Autodesk® CFD gives engineers the ability to see the invisible within their product designs. Applying this capability to electronics cooling challenges delivers amazing results. With the ability to visualize and analyze the airflow and thermal conditions of products, you can optimize the design accordingly.

"Autodesk Inventor Server Engine for 3ds Max is not installed on your system" I made a video documenting the experience and how to solve the problem. The solution is to remove the old software completely, and get the newest software. Bottom line is that legacy software is not compatible with the latest versions of the .NET framework and Windows 10.
