technically a solenoid built into the mount, rather just a sensor which, when the mount starts to collapse, closes a circuit which then sends a fault code to the engine management computer. There have been a few different part numbers for this mount: 4B3 199 379K. and . 4B3 199 379M (current) - \$230.00

with Vagcom to try and locate the problem with my cruise control, we discovered a fault code 17994. This translates to: Engine Mount Solenoid Valves (N144/N145): Short to Plus It also says it is intermittant, but when we cleared the code it came straight back. What is an Engine Mount Solenoid Valve? What does it do?
